5. Product Overview

NOTE

This IFU is only applicable to the variants of the Avon mattress listed in Technical specification Section of this document. Please ensure this IFU is applicable to your product, otherwise consult a different IFU.

Intended Use	To provide pressure redistribution when used in conjunction with an appropriately sized bed frame and as part of an overall package of care for pressure injury prevention.
Intended Users	Typical adults, adults with atypical anatomy and persons of size, with restricted to limited mobility, undergoing some medical supervision and monitoring in hospital, long-term care or care home settings.
Indications	Suitable for users identified as being at risk to high risk of developing pressure injuries.
Contraindications	Patients below the minimum or above the maximum user weight stated for the associated device.
Users	Caregivers, laypersons and/or medical professionals.
Warranty	3 years subject to regular maintenance and care.
Reusable	Devices are re-usable and must be cleaned between each patient use.
Maintenance or calibration	Perform regular mattress audits to check for foam functionality, fluid ingress and strike-through on the mattress top cover.
Accessories	Devices are not sold with accessories.
Risk Assessment	<p>It is the responsibility of the end user/care provider to carry out the necessary risk assessment to ensure patient safety. This should be carried out before using the mattress. A risk assessment should include, but not be limited to:</p> <ul style="list-style-type: none"> • Product combinations (bed frame, mattress, side rails etc.) • Extent of tissue damage (if any) • Entrapment • Patient falls • Small adults (and children) • Patients with learning difficulties • Patients with atypical anatomy • Unauthorised people with access to the controls • Use with other medical accessories e.g. incontinence products

Avon Static Mattresses

6. Product Description

Avon is a range of high-specification full-replacement static foam mattresses, with side formers (C) that provide additional stability for patient egress and ingress. The range has been developed using the very latest combustion modified ether (CME) foam technology, with the Avon Heel featuring an ultra-soft visco-foam tapered heel section to provide improved pressure relief for the vulnerable heel area. Castellations to the foam surface (B) help the foam conform to the patient’s body and increase the surface area in contact with the mattress, through immersion and envelopment. Vulnerable areas are protected via smaller castellations at the head and foot of the patient, and larger castellations at the torso to support larger bony prominences.

A	Multi-stretch waterproof, antimicrobial, vapour permeable cover
B	Castellated foam insert
C	Foam “U” core (base and side formers)
D	Polyurethane base cover

7. Product Installation & Use

7.1 Preparing the Mattress for Use

Rolled mattresses must be allowed to recover before use.

1. Take the mattress to the room it is intended for and remove from packaging. Do this using scissors rather than a knife, taking care not to damage your rolled up mattress while removing the packaging.
DO NOT USE a blade or Stanley knife as this can easily damage the cover, and the mattress will not be suitable for use.
2. The room should be warm, approx. 20°C. **DO NOT USE** a hair dryer or leave it too close to portable heaters, as this can cause damage.
3. To provide full support, leave the mattress for **at least 24 hours** before use.

Avon Static Mattresses

Mattresses that are delivered flat-wrapped can be used immediately.

7.2 Installation

1. Remove all packaging before use.

NOTE

Ensure the printed side of the mattress cover always faces upwards.

2. Place the mattress directly on the bed frame with the "foot" symbol at the foot end of the bed.

NOTE

Do not grip the mattress by the top cover or the zip flaps when lifting. Winnicare recommends performing the lifting step with 2 people wherever possible

3. Ensure the mattress is positioned centrally on the bed frame. If there is excessive movement of the mattress on the bed frame, this could indicate a size incompatibility between the bed frame and the mattress. Do not use.
4. Ensure there are no gaps between the mattress and bed frame/side rails. Perform the necessary risk assessments to mitigate entrapment risk.

NOTE

Ensure the mattress is only used with compatible equipment/accessories.

NOTE

Do not use if mattress is sliding in the bed frame. Reconsider mattress size.

NOTE

Do not use if mattress is tight fitting in the bed frame. Reconsider mattress size

NOTE

Do not drag the mattress, always carry it.

WARNING

Do not remove the mattress from the bed frame if the occupant is still on the mattress. RISK OF FALL.

8. Cleaning & Disinfection

Cleaning and disinfection of the device is mandatory. As a minimum, cleaning and disinfection should be performed before use, between each patient, at regular intervals whilst in use and before being returned to storage. Consult local practice guidelines for more details on cleaning and disinfection of reusable medical devices.

Avon Static Mattresses

Follow the instructions below to achieve a minimum level of cleaning and disinfection for safe use of the device.

WARNING

Wear appropriate personal protective equipment (PPE) when cleaning the mattress or control unit. RISK OF SKIN IRRITATION

CAUTION

Do not use phenol-based cleaning solutions, solvents, neat bleach or abrasive products to clean the casing as this may cause damage.

CAUTION

Do not use top cover if strike-through or damage is suspected.

CAUTION

Do not use Phenol-based solutions or abrasive compounds.

CAUTION

Do not autoclave.

8.1 Cleaning & Disinfection Protocol: Mattress

1. Unzip the cover on all sides.
2. Inspect the underside of the cover and the foam mattress for any signs of strikethrough or contamination. If damaged, use a new cover or mattress. Dispose of damaged items as per local protocols.
3. For general cleaning; (if using an existing cover)
 - a. Wipe down with a soft, clean, non-abrasive cloth moistened with a mild detergent and diluted in warm water (40°C).
 - b. Rinse with cold, clean water and a fresh, soft, non-abrasive cloth and allow to fully dry before use.
4. For disinfection
 - a. **Light Soiling:** Unzip the top cover from the mattress. The top cover can be machine washed up to 95°C and tumble dried on a cool setting.
 - b. **Heavy Soiling:** Carefully clean with (1,000 ppm) prepared solution of sodium hypochlorite and allow to dry completely. In extreme circumstances 10,000 ppm can be used; wipe with cold water to finish (Frequent cleaning with a high concentration disinfectant solution i.e. 10,000 ppm available chlorine, may reduce the life-span of the device).
5. Reassemble the mattress.
6. Ensure the mattress is completely dry before storage or reuse.

Avon Static Mattresses

NOTE	Frequent or prolonged exposure to higher concentration disinfectant solutions may prematurely age the fabric cover of the mattress.
-------------	---

NOTE	In the event of contamination, contact your infection prevention and control department. Remove contaminated foams from use.
-------------	--

8.2 Replacing the cover

1. Unzip the cover from the mattress and remove it carefully from the foam inner.
2. Place a new cover onto the foam inner
3. Ensure the foam inner is positioned correctly, with the corners of the foam sitting in the corners of the cover.
4. The castellated foam surface should be facing upwards when inserted into the cover.
5. Close the zip.

9. Storage

Follow the instructions below to prepare the product for storage.

1. Lay the mattress out flat.
2. Store in a dry environment, sealed in a polythene bag to protect from dirt, debris, fluids etc., with a suitable identification tag.
3. Never store items on top of a device.

NOTE	Do not store near radiators or other sources of heat.
-------------	---

NOTE	Protect the device from direct sunlight.
-------------	--

4. If taking a device out of storage, allow it to acclimatise to the operating conditions.

10. Care and Preventative Maintenance

The expected service life of this product is five years when used daily and maintained according to the manufacturers instructions.

Check mattresses (foam and cover) for strike-through (due to fluid ingress, stains, rips or damage) after each patient, after use or every month (depending on which occurs first) by a suitably qualified and competent person.

Avon Static Mattresses

The effective service life can vary according to the frequency and intensity of use. Winncare PAC Ltd. recommends an annual audit of all foam surfaces. Contact Winncare PAC Ltd to arrange your annual audit. For optimal performance, more frequent visual and operational inspections are encouraged wherever possible.

NOTE

No modification of this equipment is allowed. Use original parts only.

11. Warranty

This product is covered by a three year manufacturer's warranty as part of the General Terms and Conditions of Business.

Any warranty claims during the warranty period must be investigated by Winncare PAC Ltd, where return of the original product may be required. A warranty claim is successful if the product is faulty due to a manufacturing defect. This warranty does not cover any other damage, including but not limited to: misuse, natural wear and tear, lack of maintenance, accidental damage and unauthorised modifications.

12. Disposal

It is recommended the mattress should be disinfected prior to decommissioning. Adhere to local laws and regulations for the safe disposal of medical devices and accessories. If in doubt, contact Winncare PAC Ltd for guidance or to arrange for collection and disposal.

**WARNING**

Do not dispose in general waste. RISK OF ENVIRONMENTAL CONTAMINATION.
